

Scott Piper Consultant, Paragon Solutions Group

Piper is a senior technical executive with 25 plus years of experience. He works with business leaders to help them identify areas within their departments that can benefit from leading edge solutions to better drive profits and efficiencies. Setting clear expectations, he thrives on delighting out customers and building strong relationships. He understands the big picture of what it takes to run IT and has experience with leading large technical teams for Operations, Development, and Engineering.

Piper believes in partnering with his peers and customers to create enduring relationships. He is a proponent of the old IT adage of addressing people, process, and technology. He believes that by first understanding people and what they do is the key to business success and that then the correct technology can be employed as an enabler.

Piper has demonstrated success in the areas of technology automation, process improvement, delivering IT as a service, and DEVOPS (development operations through automation). All of these efforts have driven positive business outcomes in the form of efficiencies, quality and predictability in IT practices. He is currently focused on using his expertise to provide insight into technology and business alignment practices.

Piper holds a bachelor's degree in Business from the University of Colorado and a master's degree in Telecommunications.

In his spare time Piper's creative side emerges with his passion for metalwork and working on his mountain property.
